Summary

I am an IT student with elementary knowledge in web development, Python, IT support tools, and basic web security concepts. I have completed certified training in the spheres of web development, Microsoft Office, and penetration testing. I am a quick learner, motivated to grow, and ready to get practical experience through an internship. I seek the opportunity to improve my skills, learn from professionals, and contribute to real tasks with dedication.

Technical Skills

Web Development	HTML	CSS	JavaScript
Programming	Python (Basics)	JavaScript (Basics)	
Tools	Git/GitHub	VS Code	Linux (basic) Microsoft Office
Soft Skills	Problem Solving	Communication	Teamwork Time management

Education

Bachelor of Science in Information Technology	University of the Punjab	2021-2025	2.46/4.00 CGPA
Diploma of Associate Engineer in Mechanical	PBTE	2018-2021	72%
Matriculation	Bise Lahore	2016-2018	72%

Certificates

Microsoft Office

Wells Computer College

Web Development Course

NAVTTC
(Government of Pakistan)

Penetration Testing Web Hacking Course

[Kamyab Freelancer Program](#)
[\(Government of Punjab\)](#)

Intermediate Malware Analysis Course

[Cybersecurity Training](#)

Experience

Total working experience 5 years

Key Punch Operator

5 years' working experience with **Rustam Food Company** (Distribution)

(2020-2025)

Management Responsibility:

- Managed data entry, invoicing, and reporting using digital tools (Salesflo, S&D Pro).
- Maintained system-generated inventory data with accuracy.
- Ensured correct financial records using software-based recovery systems.
- Used computer-based tools for reporting and daily operational updates.

Projects:

NorthTravelPK (Web Application)

- Built a full-stack tourism portal featuring real-time tour management, automated booking enquiries, and localized safety alerts.
- Designed a mobile-first UI with Bootstrap and integrated Google Maps for enhanced location-based services.
- Developed an advanced Admin Panel to manage content, track user interactions, and moderate community reviews.

Macro-Based Malware Simulation and Reverse Shell Exploitation using Kali Linux

Developed a cybersecurity penetration testing project using Kali Linux and Windows 7 in a virtual lab environment. Created and deployed macro-enabled malicious documents, generated reverse TCP Meterpreter payloads using MSFVenom, and established remote shell access through Metasploit Framework. Performed MITRE ATT&CK mapping and VirusTotal analysis to simulate real-world malware delivery and post-exploitation techniques.
